

# EvoluSIM

## SOLUTIONS - Chess Edition

Oberthur Technologies offers the mobile operators to host solutions platforms with the EvoluSIM hosting. EvoluSIM is based on a partnership between Oberthur Technologies and the French company, Prosodie. This service is the alternative for MNOs who want to outsource services and exploitation means linked to a platform allowing them to focus on their core business.

### The Queen of quality hosting services

#### Tailor the solutions to mobile network operator's needs through the EvoluSIM hosting offer

To best suit mobile network operators' needs, Oberthur Technologies has created EvoluSIM, a hosting offer, for mobile network operators who want to limit investment costs, focus on service definition and pay only for the services they use.

The implementation of EvoluSIM can vary from a direct and secured access to the range of solutions hosted by Oberthur Technologies for the operators' account, to a fully operator-managed service.

#### EvoluSIM will make you save money and optimize your investments while focusing on your core business

Outsourcing services minimizes investment costs as hardware, third parties software licences and operating competencies as they are included in the service.

It improves mobile network operators' supply chain by allowing the post-issuance management of (U)SIM cards.

It is also a unique offer for smooth deployment and quick time to market of new services.

#### An end-to-end service offer

EvoluSIM does not require any expertise from the user as the service is operated directly by Oberthur Technologies' experts:

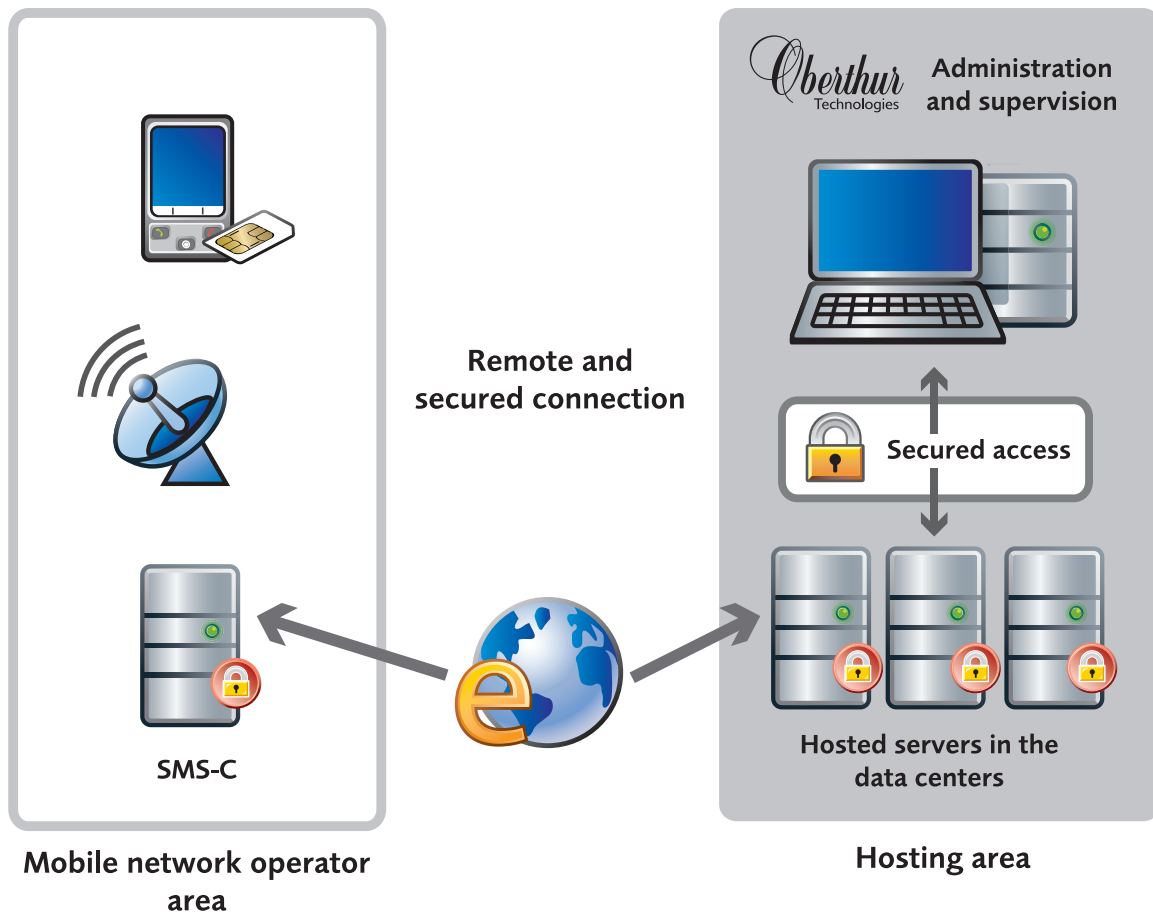

- Dedicated and experienced project management team bringing a complete approach from functional definition to solution integration
- Dedicated local technical support helped by a global centre of expertise
- Market player close to its customers
- A project management attentive to our customers' needs to provide them the solution that fits their expectations
- Partner to build Value Added Services to increase ARPU

The support team will take over the project once deployed:

- Ensure short time-to-market with an optimized set-up cost
- A package of services to solve any kind of issue:
  - Operation
  - Maintenance
  - Support
  - Available for 24/7 exploitation

The mobile network operators will have access to their applications at any time:

- Web access available for end users and customer care
- Periodical reporting on servers/network activities
- Year-round supervision and alert

#### EvoluSIM: High quality data center for services

- Secured access, building survey (fire, etc.)
- Uninterruptible Power Supply (UPS), cooling system
- Redundant telecommunications access
- On-site 24/7 monitoring/troubleshooting services and supervision

#### Additional features

- Seven internet accesses infrastructure
- All links are redundant
- Service availability
- Burst capacity
- VPN channels
- Many remote connection modes available

#### Management of Solutions using the EvoluSIM hosting service offer

- Administration: ALM
- Phonebook management
- Portal management
- NFC (Near Field Communication) services

Oberthur Technologies respects the environment.

The number of printed brochures produced by the company has been significantly reduced to save paper. Printed documents are produced on FSC-certified paper using aqueous inks to reduce environmental impact. Datasheets are available in electronic format only.
